

Krzysztof Broniszewski

AI / Machine Learning / Computer Vision Engineer

Krakow • +48 510 852 282 • k.broniszewski@gmail.com

CV LinkedIn GitHub Portfolio

PROFESSIONAL PROFILE

I develop solutions in Machine Learning, Computer Vision and AI, primarily using Python, PyTorch, OpenCV and scikit-learn. My projects cover the full workflow - from data preparation and analysis, through model training and evaluation, to building applications that demonstrate their performance. I am particularly interested in Computer Vision and practical AI applications in image analysis. I combine technical skills with many years of experience in graphics, digital publishing and production process optimization. I am looking for opportunities to further develop as an AI/ML or Computer Vision Engineer.

TECHNICAL SKILLS

Programming

Python • SQL

Machine Learning

scikit-learn • classification • regression • preprocessing • feature engineering • model evaluation

Deep Learning

PyTorch • TensorFlow/Keras • CNN • transfer learning

Computer Vision

OpenCV • YOLO • MediaPipe • image processing and analysis

Generative AI / NLP / LLM

ComfyUI • FLUX • Stable Diffusion / SDXL • ControlNet • LoRA • IP-Adapter • Inpainting • Upscaling • WAN Video • workflow design and modification
NLP: tokenization • lemmatization • sentiment analysis • embeddings • BERT / Transformers

Data & Visualization

Pandas • NumPy • Matplotlib • Plotly

Databases

PostgreSQL • BigQuery

Applications / Tools

Dash • React • Flask • Git • GitHub • Docker • Jupyter Notebook • Google Colab

PROJECTS

- 01

Face Emotion Recognition - Deep Learning / Computer Vision
Facial emotion recognition model using ResNet18 and transfer learning. Preparation of the data-processing pipeline, model training and evaluation, and implementation of image prediction.
Technologies: Python • PyTorch • OpenCV • ResNet18

GitHub
- 02

Drone Image Quality Assessment - Deep Learning
Automatic quality assessment system for drone photographs using deep learning. The project combines image analysis with a practical Computer Vision application for selecting photographic material.
Technologies: Deep Learning • Computer Vision • image quality analysis

GitHub
- 03

Road Accident Analysis in Poland 2004-2023
Interactive dashboard using Polish National Police Headquarters data to analyze road accidents in Poland. Data preparation and transformation and interactive visualizations enabling analysis of changes over time.
Technologies: Python • Pandas • Plotly • Dash

GitHub
- 04

California Housing - Machine Learning
Regression project covering data preparation, feature analysis, model training and comparison, and performance evaluation.
Technologies: Python • Pandas • scikit-learn

GitHub

PROFESSIONAL EXPERIENCE

Walstead Krakow Sp. z o.o. | Krakow

ISM Production Costing and Preparation Specialist | 02.2023-11.2026

- Preparing production cost calculations in Signa and analyzing costs, materials, supplier offers and subcontractor quotations.
- Independently created and developed an Excel tool for monitoring orders, production stages, deadlines and missing data.
- Coordinating production processes, planning tasks and deadlines, and working with clients, suppliers and internal teams.
- Technical verification and preparation of files and print layouts, checking compliance with specifications and preparing materials for approval.
- Analyzing and improving workflows, solving technical problems and automating selected repetitive tasks.

Previous Professional Experience | 2005-2023

DTP / Prepress / Digital Printing / Graphic Design

- Extensive experience in technical preparation and verification of graphic files, DTP, prepress, and digital and offset production.
- Working with advanced production-preparation and imposition systems, Adobe software, CorelDRAW and file-control tools.
- Designing graphic materials and packaging and preparing them for various production technologies.
- Experience in managing production, a small team, warehouse operations and procurement.
- Running my own business, E-GRAPH - digital production, graphic design, customer service and business management.

Experience includes: Mellow • Belcaro/Pasaz • Brillo • Legra • Alnus • Drukarnia GS • Naswietlarnia B1+/Djaf

Own business: E-GRAPH

COURSES & CERTIFICATES

CodeBrainers - Data Science + AI Bootcamp

12.2024-06.2025 | 260 class hours

Python • SQL • Pandas • scikit-learn • XGBoost • Machine Learning • Deep Learning • CNN • NLP • Spark • Databricks • BigQuery

Practical Python | Python Programming Course

05.2022-07.2022 | 8 weeks | 8 projects

Python • Pandas • Jupyter Notebook • Flask • data and Big Data analysis • text and sentiment analysis • application development

EDUCATION

Cracow University of Technology

Faculty of Technical Physics and Computer Modelling

Studies not completed | 2002-2004

General Secondary School in Muszyna

IT profile | 1996-2000

ACHIEVEMENTS

- Winner of the "Damy Rade! Otwieramy własny biznes" competition - preparation and defense of a business plan and obtaining full funding to start E-GRAPH.

LANGUAGES

Polish native

English B1 (good understanding of technical documentation)

INTERESTS

Drones and aerial photography • Computer Vision • Generative AI • photography and post-production • video editing
